

Base module spec – *Our Starting Platform*

The Pure Offroad RV Camper Module is built using quality rust or rot proof materials with the latest composite technologies. DuPont Foam Core insulation, aluminum honeycomb and fiberglass techniques used of throughout the build process ensures you get high levels of comfort, space utilization and a strong investment for years to come.

A robust marine grade alloy sub frame and Trunion mounted system provides piece of mind when travelling offroad that isn't offered by other manufactures'. It's a 3 point kinetic mount with shock absorbers to provide freedoms for the truck chassis to twist and not damage the living module.

A Pure Offroad RV Base Module dimensions / weights are based upon the Iveco Daily 4x4 single cab chassis, however these specifications can easily be changed to suit customer requirements. We can cater for different truck chassis, personal height requirements, extended truck chassis, etc.

- Width 2070mm (internal 2010mm);
 - Maximum length 3760, (internal 3700mm).
 - Height overall 3400mm, (internal 1900mm)
 - Nominal Dry weight: 3700kg*
 - Nominal Wet Weight: 4000kg*
- (*depending on options fitted)

Pure Offroad RV can offer customers a choice of design, fabric colours, laminate and flooring to your own requirements. Each Camper Module is tailored to your requirements, custom means custom! If you don't like something or wish to add in extra items, we can do it!
